shell Difference between sh and bash Stack Overflow

March 22nd, 2019 - Shell is an interface between a user and OS to access to an operating system's services. It can be either GUI or CLI Command Line interface. sh Bourne shell is a shell command line interpreter for Unix. Unix-like operating systems provide some built-in commands. In scripting language, we denote interpreter as `bin/sh`. It was one of the most widely supported by other shells like bash, free.

» Zero Padding in Bash Jonathan Wagner

March 20th, 2019 - Thanks for the tips. For your particular case, you can use `seq` with no problem. But sometimes you may need to use these numbers as array indexes, which is my case, in which I cannot use `seq` with `w` as Bash considers `01 02` as octal numbers, so `08` and `09` would be illegal. index

Yocto Project Reference Manual

March 20th, 2019 - This version of the Yocto Project Reference Manual is for the 2.6.1 release of the Yocto Project.
