**Keys to DevOps Success DZone DevOps**

March 17th, 2019 - Successful DevOps implementation is a function of a culture of collaboration and real time feedback on mutually agreed upon metrics for automated processes

**Service oriented architecture SOA** Wikipedia

March 14th, 2019 -

Service oriented architecture SOA is a design paradigm for developing systems as a collection of loosely coupled services. The idea here is to break down a monolithic monolithic application into a collection of services that can be developed and deployed independently. This allows for greater flexibility and scalability. SOA is based on the principle of loose coupling, where services are designed to interact with each other through well-defined interfaces. This makes it easier to replace or update individual services without affecting the entire system. SOA is often implemented using web services, such as REST or SOAP. SOA is a key component of cloud computing and microservices architecture.

**Gartner Application Strategies amp Solutions Summit 2018**

November 26th, 2018 - The goal of this workshop is to provide attendees with a hands on and engaging introduction to the human centered design practice of design thinking
