The Phenomenology of Dissipative Replicative Structures

February 19th, 2019 - Ilya Prigogine (1917-2003) has put forward that dissipative structures do not obey Boltzmann's order principle because a dissipative structure is not in equilibrium. Moreover, one must admit that the universe is not in equilibrium; it is forever changing, evolving as it were. This observation is key to understanding how the evolution of our universe and its embedded structures.
